TeSys H

Ultra-compact 22.5 mm motor starters

Schneider Electric

Assembled motor starters

Fully integrated

Ultra-compact starters
TeSys H

Ultra-compact starters
TeSys H

The most compact 3 KW / 400 V starter in the world

Up to 75 % of space reduction

- Ultra-compact 22.5 mm starter
- Reversing starter in the same width
- Maximum space savings for group starter architecture

Long electrical durability

- Suitable for high demanding application
- 30 000 000 of AC53a electrical cycles

> With printed QR code, refering directly to the product data sheet.

Easy Design

- Wide range setting motor protection
- Automatic, manual or remote reset after thermal trip
- Wide range of control voltage

Easy to integrate

- Direct mounting installation on DIN rail
- Control terminals on the upper side
- Power terminal on the lower side

Ultra-compact starters
TeSys H

Standard version

- 2 ratings:
  - 2.4 A 400 V AC53a
  - 6.5 A 400 V AC53a
- 2 control voltages:
  - 24 V DC
  - 110 V / 230 V AC
- 2 terminal types:
  - Screw clamps
  - Spring
- Can provide up to 3 functions:
  - Forward running
  - Reverse running
  - Overload protection

Safety version

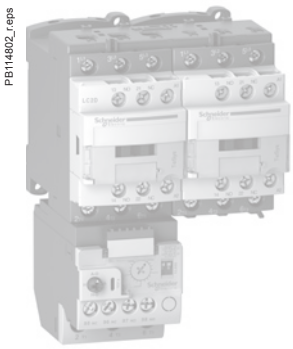
- Safe Torque Off embedded:
  - SIL3 according to IEC61508-1
  - Ple according to ISO13849-1
- ATEX:
  - As associated devices for motor protection

> TeSys H is a solution dedicated to low footprint applications, in industries as food and beverage, logistics, and durable goods.

Ultra-compact starters
TeSys H

Conventional ..... OR ..... TeSys H standard solutions

Direct-on-line



Reverse

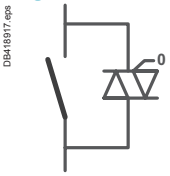
> How does the hybrid technology work ?

Hybrid technology:

Each contact is coupled with a power semiconductor for switching

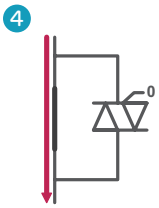
> Higher number of on/off switches, extended durability.

> Closing



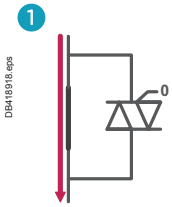
Start: conduction through the semiconductor.

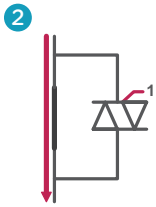
Contact closure under zero voltage. No electrical arc: the contact is preserved.



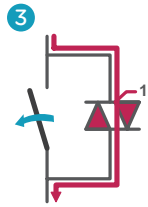
The semiconductor is non-conducting.

> Opening





Before the opening of the contact the semiconductor is triggered.

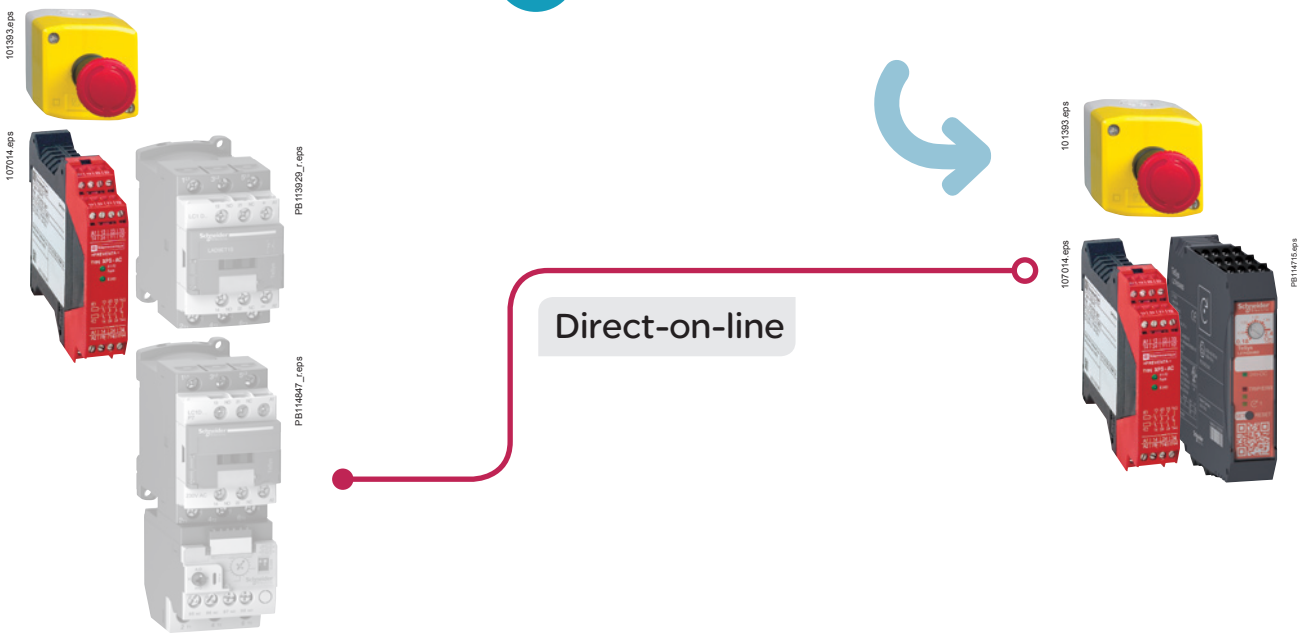


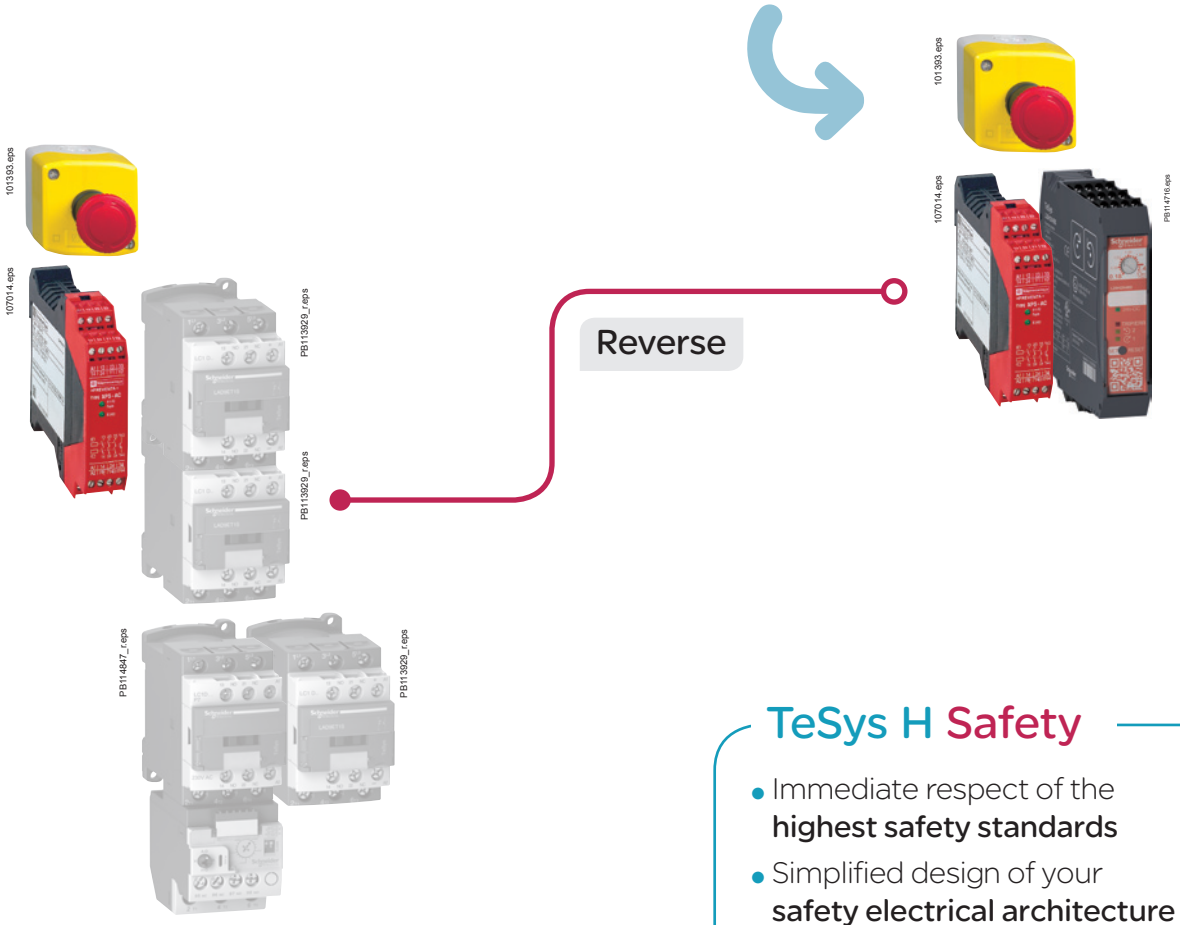
Contact opening:
- no arc: the contact is preserved.

Stop: the semiconductor becomes non-conducting.

Ultra-compact starters
TeSys H

Conventional ..... OR ..... TeSys H safety solutions





TeSys H Safety

- Immediate respect of the **highest safety standards**
- Simplified design of your **safety electrical architecture**
- **Quicker** panel implementation

Ultra-compact starters
TeSys H Standard
Safety - IEC ratings

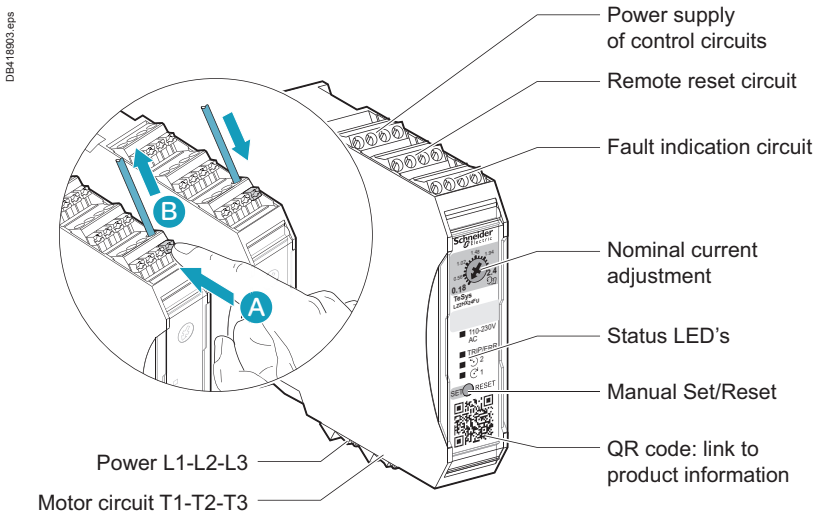
TeSys H – Ultra-compact motor starters

Ultra-compact starters
TeSys H

Identification of terminals / Indicators / Setting means and procedure

Setting procedure



STEP	ACTION
1	Lift the cover on the front of the TeSys H motor starter to access the SET/RESET button.
2	Press and hold down the SET/RESET button for at least 6 seconds. After 6 seconds the 110-230 V AC or 24 V DC LED flashes once.
3	After the LED has flashed once, release the SET/RESET button.
4	Turn the potentiometer to select a nominal current, and then fine-tune the position until the LEDs indicate the exact nominal current.
5	Press the SET/RESET button to save the selected nominal current. The 110-230 V AC or 24 V DC LED comes on and the other LEDs go off.
6	Drop the cover back over the front of the TeSys H motor starter.

Protection functions

The protection of three - phase motors is ensured against potential faults

- Thermal overload: the motor currents exceed the set value.
- Phase unbalanced: the motor currents differ from each other by more than 33 %
- Phase loss: power missing on one or several phases
- Stall and jam: motor current exceeding 45 A for more that 2 s during starting or running phase - No motor is connected - Motor current is lower that the minimum configurable current for more than 2 seconds, on at least two phases.

For all this detected situations, the TeSys H motor starter will switch off, activate its TRP/ERR LED and fault signaling contact.

Please refer to the “Instruction sheet and User Guide” for more information.

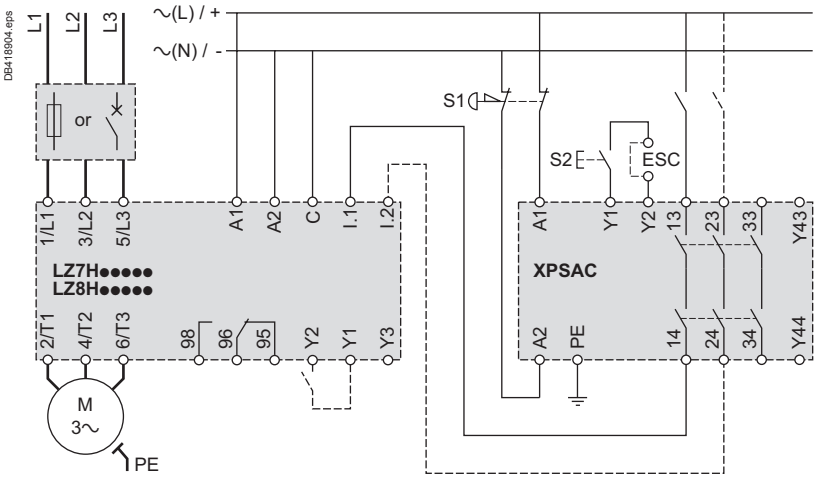
TeSys H

Electrical diagrams for Safety chain applications

Preferred

Electrical life time: 30000000 AC53a electrical cycles

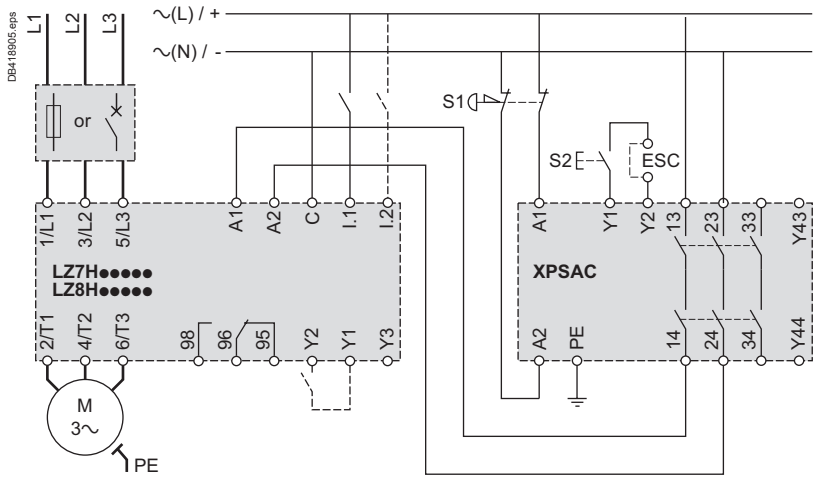
Safety Chain Application for Monitoring Emergency STOP Circuits with Two Channel Inputs and Two Channel Outputs with Preventa XPSAF Safety Processing Device.



Possible but non- recommended

Electrical life time: 10000 AC53 a electrical cycles

Safety Chain Application for Monitoring Emergency Stop Circuits with Two Channel Inputs and Two Channel Outputs with Preventa XPSAC Safety Processing Device.



Ultra-compact starters

Environment

Rated insulation voltage (Ui)	Conforming to IEC/EN 60947-1, overvoltage category III, degree of pollution: 2	**V**	500
Rated impulse withstand voltage (Uimp)	Conforming to IEC/EN 60947-4-2	**kV**	6 (24 V DC control voltage); 4 (110 V - 230 V AC control voltage)
Conforming to standards			IEC / EN 60947-4-2
Product certifications			CE, CUL, ATEX (for failsafe product), CCC (on going)
Degree of protection	Conforming to IEC / EN 60947-1		IP20
Environment category	Conforming to IEC / EN 60947-1		E
Protective treatment	Conforming to IEC/EN 60068-2-30		"TC"
Ambient air temperature around the device	Storage	**°C**	-40…+80
	Operation (see derating curves)	**°C**	-25…+70
Maximum operating altitude	without derating	**m**	2000
	with derating	**m**	No
Operating positions (see derating curves)	Vertical axis (horizontal DIN rail)		Yes
	Horizontal axis (vertical DIN rail)		Not authorised
Shock resistance 1/2 sine wave = 18 ms	Conforming to IEC/EN 60068-2-27	**gn**	30 Starter OFF
		gn	30 Starter ON
Vibration resistance 10…150 Hz	Conforming to IEC/EN 60068-2-6	**gn**	5 Starter OFF
		gn	5 Starter ON
Resistance to electrostatic discharge	Conforming to IEC/EN 61000-4-2	**kV**	Air discharge: 8 kV
		kV	Contact discharge: 6 kV
Immunity to radiated high-frequency disturbance	Conforming to IEC/EN 61000-4-3		
	80 - 1 GHz	**V/m**	20
	1.0 - 6 GHz	**V/m**	10
Immunity to fast transient currents	Conforming to IEC/EN 61000-4-4	**kV**	3
Immunity to conducted high frequency disturbances	Conforming to IEC/EN 61000-4-6	**V**	10
Radiated emission and conducted	Conforming to CISPR 11 and EN 55011		Class A
Surge	Conforming to IEC/EN 61000-4-5	**kV**	1 symmetrical
		kV	2 asymmetrical

Control circuit characteristics

Rated voltage	∼ 50/60 Hz	**V**	110 - 230
	⎓	**V**	24
Voltage limits	∼ 50/60 Hz	**V**	85…253
	⎓	**V**	19.2…30
Voltage dips		**ms**	3
Short time interruptions		**ms**	3

Power circuit characteristics

			LZ●2X4●●	LZ●6X5●●

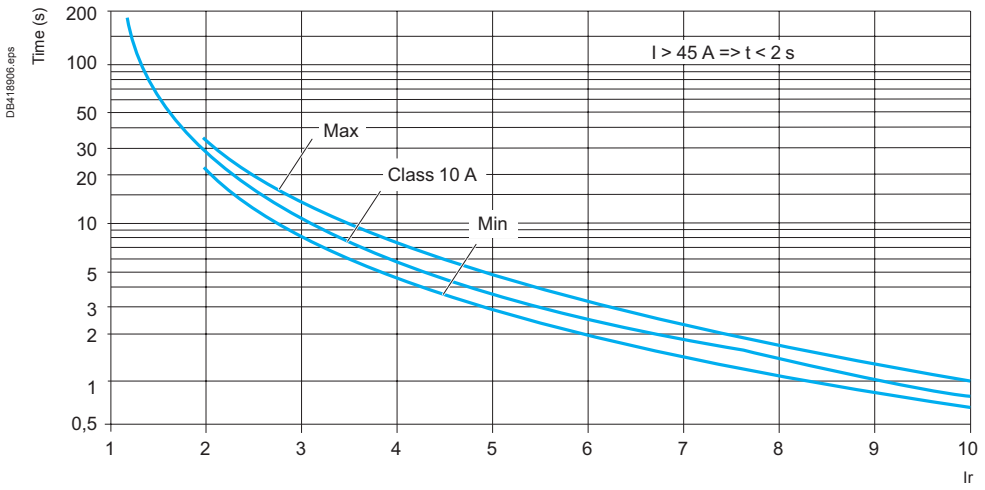
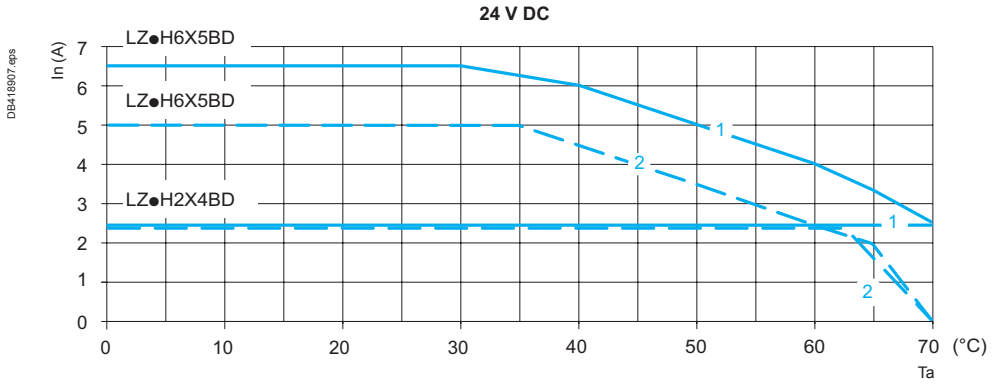
DC [%] Diagnosctic coverage		93	95
Safety level		IEC/CEI 61508-1: SIL 2	

Ultra-compact starters
TeSys H

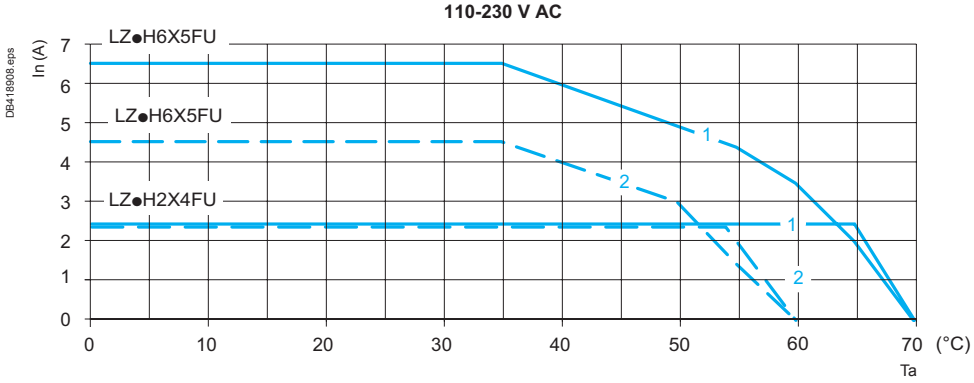
Overload protection tripping curve at 20 °C



Derating curves: maximum load current (In)



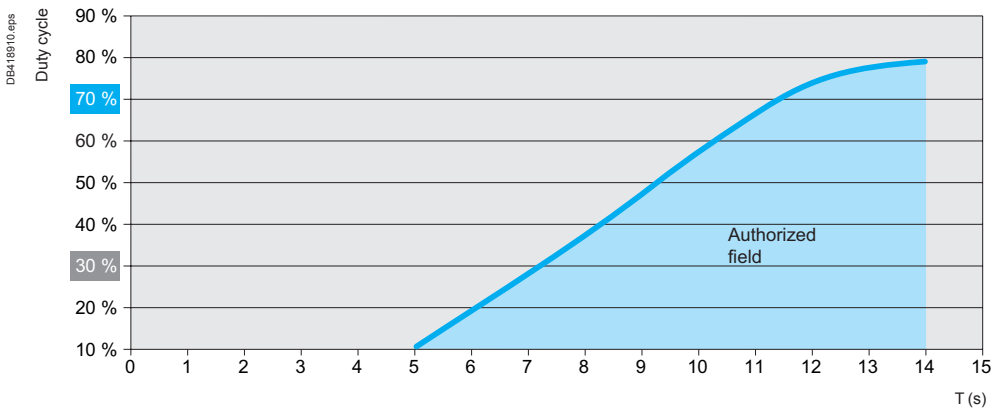
Derating according:
- motor starter control power supply
- ambient temperature (Ta)
- distance between devices **1**: 20 mm, with spacing
  2: without spacing.



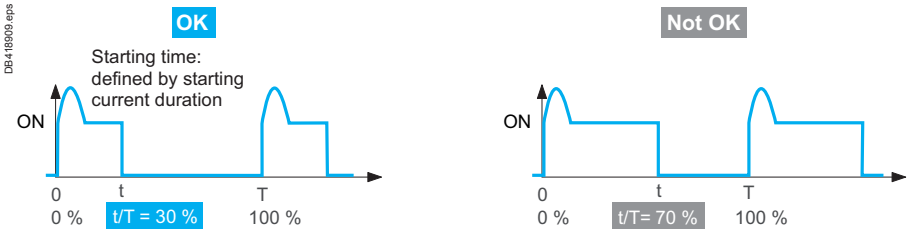
Minimum duty cycle t/T (%) versus cycle duration T (s)

Due to the effect of the peak current on the TeSys H monitoring circuit during the starting time, a stop/start sequence should not occur before a certain amount of time. The diagrams below show the minimum duty cycle according the total period for 2 typical starting time values.

With a starting time = 100 ms



Example: for starting time = 100 ms



With a starting time = 150 ms
